Application No.2016/1308  
Lidgett Lane Pilley

Dear Sir/ Madam

In response to the above application, and despite the fact that I believe "Consultation" really means "already decided", nevertheless I would like to make clear my strong objections that the council is not working for its ratepayers.

This development will totally destroy this tradition rural area.

The building of a high block of flats virtually on the village green will change the whole aspect of the village for all residents and many walkers, cyclists and horse riders who very regularly enjoy "the country".

The provision of addition parking instead of well established hedgerows, will in no way provide for the wildlife evicted.

The huge increase in traffic on already very busy surrounding lanes can only lead to a more unsafe area.

The removal of cultivated fields to be replaced by roads and pathways will in no way relieve the already troublesome flooding on lower areas of road.

I am not aware of any improved local amenities such as school capacity or bus services, so again car volume especially at peak times will obviously increase.

We have moved to to this area for its rural features which will be removed by this development.

Yours sincerely,

M Butterfield
